# 5<sup>th</sup> Project Meeting in Larnaca, Cyprus

The ENGINITE 5<sup>th</sup> Transnational Project meeting took place in Larnaca Cyprus, on the 14<sup>th</sup> of October.

The partnership selected a very unique location for this meeting i.e. @YouthMakerSpace, in order to conclude the project in the best possible manner.

As part of the project meeting the ENGINITE partners had the opportunity to review all pending issues, with a highlight on important chapters to be included in the project's final report.

Particular emphasis was given on discussing the project's overall impact and further exploitation plans.

The final meeting was very productive, and was marked with positive comments by all partners.

---

*“A successful 2-year collaboration with a great consortium has now reached its end. Thank you to all who participated in our project.”*

---

## A positive internship period for young engineers: The ENGINITE helps unemployed engineers to find a job

Our young engineers completed their internships with the Cyprus and Greek companies, and their overall experience was very positive. We are happy because the internship period had an impact on the employment for some of young engineers, who were unemployed when they entered our innovative programme, and managed to find a job. Through a very systematic evaluation process, we have also concluded that the programme as a whole offered valuable skills to the young engineers. The top ranked skills were project management, communication and innovation. Visit our Facebook community and find out the testimonials shared by our young interns: <https://www.facebook.com/EnginiteErasmus/>

## Multiplier events: Six multiplier events were successfully hosted in Cyprus and Greece

Six multiplier events have been successfully hosted in Cyprus and Greece. During these events the consortium had the chance to disseminate the project results to interested stakeholders, public authorities and the general audience. The attendance to these events was satisfactory, a fact which pleased our team since it was a real proof of the interest and impact of our ENGINITE project. Make sure to catch the news section in our website in order to receive more info on all the multiplier events hosted (<https://www.enginite.eu/news-events/>).

## A FINAL CONCLUDING MESSAGE FROM OUR PROJECT COORDINATOR

The two-years journey of the ENGINITE project is successfully coming to an end. Reflecting upon this journey with the project consortium, it is a pleasure to see that all the milestones set at the project have been effectively met as follows:

**Achievement 1:** A handbook was successfully developed for PBL/VET providing useful guidelines for instructors, academics and/or practitioners on how to develop new, VET tertiary level and industry-oriented courses in the content of hands-on PBL and work-based experiences (For more information visit: <https://www.enginite.eu/pedagogy/>)

**Achievement 2:** The Educational Content of the ENGINITE Training Programme, which was consisted by: (a) the educational training programme, (b) the Guidebook for Trainers that can help all interested trainers to deliver the course developed, (c) the Guidebook for Mentors and (d) the programme specification, were successfully delivered and designed(For more information visit: <https://www.enginite.eu/pedagogy/>)

**Achievement 3:** The ENGINITE Online Training Platform was successfully developed in parallel with the development of the ENGINITE training programme and the Guidebooks in order to make available the ENGINITE Training Programme through internet. The Online Training Platform was one of the most important Intellectual Outputs of ENGINITE project (<https://platform.enginite.eu/>)

As the ENGINITE project and the achievement of its goals was a collaborative effort, as the Project Coordinator, I would like to thank all the stakeholders involved and contributed to these milestones during the last two years: our young engineers, the trainers, the mentors and our invited speakers, the involved companies but most of all, I owe big thank you to all the partners for making this project a real journey!

## THANKS TO ALL PARTNERS FOR MAKING THIS PROJECT, A REAL JOURNEY.
